Hazard ID	Situational Analysis		
	Operational Mode	Operational Scenario	Environmental Details
HA-001	Normal Driving	Highway	Rain (slippery road)
HA-002	Normal Driving	Country Road	Normal Condition
HA-003	Normal Driving	Road with construction site	Normal Condition
HA-004	Normal Driving	Road with construction site	Normal Condition

Situation Details	Other Details (optional)	Item Usage (function)	Situation Description
High Speed		Correctly Used	Normal driving on a highway during rain at hight speed
High Speed		Incorrectly used	The driver is misusing the lane keeping assistance function as an autonomous function.
High speed		Correctly Used	Normal driving on a road with construction site at high speed
High speed		Correctly Used	Normal driving on a road with construction site at high speed

Hazard Identification			
Function	Deviation	Deviation Details	Hazardous Event (resulting effect)
Lane Departure Warning (LDW) function shall apply an oscillating steering torque to provide the driver with haptic feedback	Actor effect is too much	The LDW function applies an oscillating torque with very high torque (above limit).	Collision with other vehicle
Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane.	Function always activated	LKA function is always activated without any requirement for the driving to keep their hands on the steering wheel.	Collision with other vehicle
Lane Departure Warning (LDW) function shall apply an oscillating steering torque to provide the driver with haptic feedback	Function unexpectedly activated	Camera subsystem fail to pick correct lane and LDW function incorrectly vibrates the steering wheel	Collision with other vehicle
Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane.	Function unexpectedly activated	Camera subsystem fail to pick correct lane and LKA incorrectly attempts to stay on the incorrect lane.	Collision with other vehicle

		Hazardous Event
Event Details	Hazardous Event Description	Exposure (of situation)
High torque (above a limit) can cause the steering wheel to oscillate and the drive to lose control of the vehicle.	LDW apply a high torque on a slippery wet road at high speed driving	E2
The driver is misusing the lane keeping assistance function as an autonomous function and collides with another vehicle as he does not observe the traffic.	LKA is active and the driver is not required to keep hands on steering wheel.	E3
Camera subsystem generates a faulty signal (due to construction site lane markings) and the driver is alerted, this might cause a human error and a collision with another vehicle	LDW issues an incorrect warning which distracts the driver.	E2
Camera subsystem generates a faulty signal (due to construction site lane markings) and the LKA attempts to follow an incorrect lane which results in a deviations and a collision	LKA attempts to follow an incorrect lane	E2

Classification	Classification			
Rationale (for exposure)	Severity (of potential harm)	Rationale (for severity)	Controllability (of hazardous event)	
Driving on a rainy highway doesn't occur on a daily basis	S3	Losing control of the vehicle on high speeds on a highway can cause fatal injuries	C2	
This scenario occurs can occur on a daily basis for all drivers.	S3	Losing control of the vehicle on high speeds on a highway can cause fatal injuries	C1	
Driving on a constructions site is not a common event	S3	Departing a lane on high speeds on a construction site can cause fatal injuries	C0	
Driving on a constructions site is not a common event	S3	Departing a lane on high speeds on a construction site can cause fatal injuries	C1	

	Determination of	ASIL and Safety Goals
Rationale (for controllability)	ASIL Determination	Safety Goal
The driver can take control of the steering wheel	ASIL A	The LDW function shall be torque limited to avoid oscillations and loss of control.
The majority of drivers will be able to regain control of the vehicle.	ASIL B	The LKA function shall be time limited and the additional steering torque shall end after a given time interval so that the driver cannot misuse the system as an autonomous driving feature.
Controllable in general	QM	The LDW function shall not be active in case of a camera subsystem malfunction
The majority of drivers will be able to regain control of the vehicle.	ASIL B	The LKA function shall not be active in case of a camera subsystem malfunction

Exposure	
ID	Description
E0	Incredible
E1	Very low probability
E2	Low probability
E3	Medium probability
E4	High probability
Severity	
ID	Description
S0	No injuries
S1	Light and moderate injuries
S2	Severe and life-threatening injuries
S3	Life-threatening or fatal injuries
Controllability	
ID	Description
C0	Controllable in general
C1	Simply controllable
C2	Normally controllable
C3	Difficult to control or uncontrollable

Duration (of situation)

Not specified

<1 % of average operating time

1 % to 10 % of average operating time

>10 % of average operating time

Remarks

No injuries

Light and moderate injuries

Severe and life-threatening injuries (survival probable)

Life-threatening injuries (survival uncertain), fatal injuries

Remarks

Controllable in general

99 % or more of all drivers or other traffic participants are usually able 90 % or more of all drivers or other traffic participants are usually able Less than 90 % of all drivers or other traffic participants are usually at

Frequency (of situation)
Occurs less often than once a year for the great majority of drivers
Occurs a few times a year for the great majority of drivers
Occurs once a month or more often for an average driver
Occurs during almost every drive on average
Probability of Injuries
AIS 0 and less than 10 % probability of AIS 1-6
More than 10 % probability of AIS 1-6 (and not S2 or S3)
More than 10 % probability of AIS 3-6 (and not S3)
More than 10 % probability of AIS 5-6

Reference		
E0 - Incredible		
E1 - Very low probability		
E2 - Low probability		
E3 - Medium probability		
E4 - High probability		
Reference		
S0 - No injuries		
S1 - Light and moderate injuries		
S2 - Severe and life-threatening injuries		
S3 - Life-threatening or fatal injuries		
Reference		
C0 - Controllable in general		
C1 - Simply controllable		
C2 - Normally controllable		
C3 - Difficult to control or uncontrollable
